

GENERAL SURGERY TRAINEE WORKSHOP

29 - 30 July 2009

WITH OPTIONAL VASCULAR SURGERY DAY

31 July 2009

The General Surgery Trainee Workshop with an optional third day involving Vascular Surgery, provides General Surgical Trainees the opportunity to learn new skills in a range of procedures. Participants will have the privilege of using fresh frozen cadaveric materials, a superior teaching model due to its high degree of anatomical realism and near normal tissue properties. The Workshop will use a combination of pre-reading, discussion, and dissection to further trainees' understanding of historical and contemporary surgical techniques, the immediate anatomy of the structures operated on and adjacent structures which may be involved in the event of other co-morbidities or complications.

This course is aimed at General Surgery Trainees.
